

Proposal of Agenda for US State department/GCF Fund Visit

Objetivos de la visita desde el punto de vista de US State Dept.

- 1) updating the attached DOS Monitoring Site Visit worksheet done in 2013 to reflect any changes since the cost amendment, (Fondo GCF tiene esa hoja)
- 2) producing a Success Story for DOS's annual Performance Plan and Report in November.

We may also be able to feature the project in other communications materials for the COP or Congressional hearings, so it'd be great to get photos and quotes from beneficiaries about project impacts.

During the field visit, the US State Dept would like to observe and discuss project activities and their impacts with the implementers, partners, and beneficiaries. Other questions include:

- How effective have outreach activities, publicity, and project visibility been?
- How are project results shared with the government, local organizations, and DOS?
- How are project indicators monitored and reported on by sub-recipients?
- What gaps have GCF Fund projects filled that other grant makers were not addressing?

Agenda propuesta:

Date	Activity	People involved
19 th Oct	Travel from San Cristobal de las Casas (EcoLogic), Villahermosa airport (visitors / Tabasco) or Palenque (representatives from other states) to Naha, Selva Lacandona, Chiapas	EcoLogic: Travel by Car from San Cristobal.
